## Activity Report

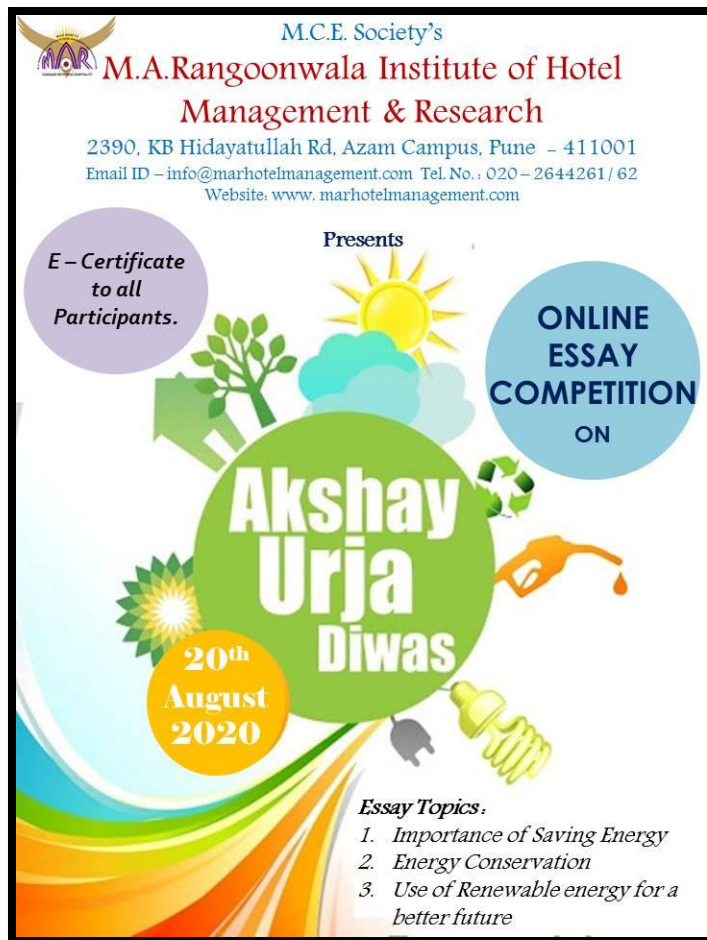

**Akshay Urja Diwas**

**Date: 20/08/2020**

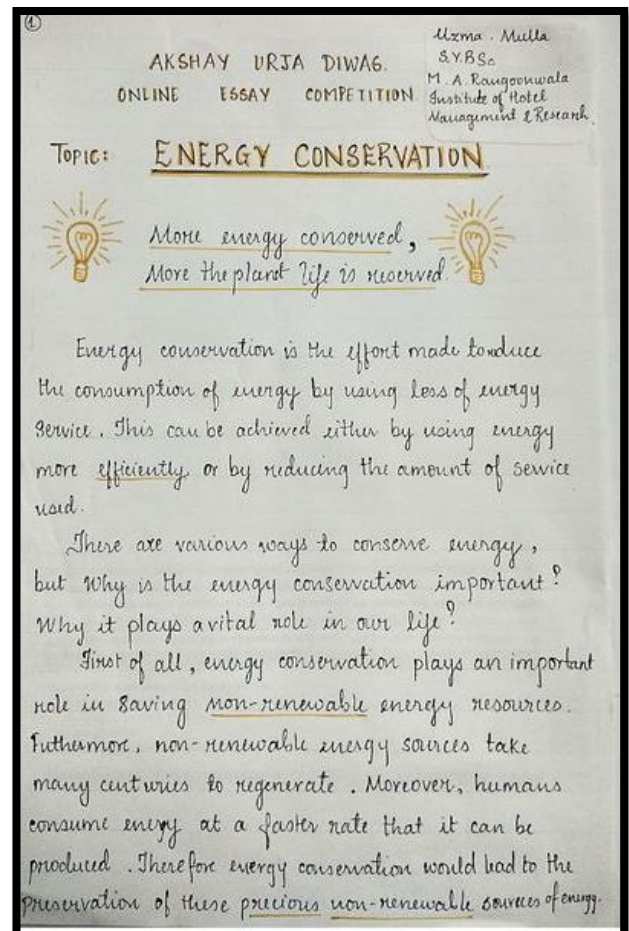

M.C.E. Society's M.A.Rangoonwala Institute of Hotel Management & Research celebrated the Akshay Urja Diwas on 20th August 2020 by organizing an Online Essay Competition for the students.

The winners of the online essay competition are -

1. Uzma Mulla - S.Y.B.Sc.(HS)
2. Sakshi Pataskar - T.Y.B.Sc.(HS)
3. Prajakta Shirke - T.Y.B.Sc.(HS)

The poster features the M.C.E. Society's logo and name at the top. It includes the address: 2390, KB Hidayatullah Rd, Azam Campus, Pune - 411001, and contact information: Email ID - info@marhotelmanagement.com, Tel. No. 020-2644261/62, Website: www.marhotelmanagement.com. The central theme is 'Akshay Urja Diwas' on '20th August 2020'. It mentions 'ONLINE ESSAY COMPETITION ON' and 'Presents'. A purple circle states 'E - Certificate to all Participants.' The bottom section lists 'Essay Topics': 1. Importance of Saving Energy, 2. Energy Conservation, 3. Use of Renewable energy for a better future. The design is colorful with icons of a sun, trees, a recycling symbol, a lightbulb, and a plug.

The handwritten essay is on a piece of paper with a grid pattern. At the top right, the student's name 'Uzma Mulla' and details 'S.Y.B.Sc. M.A. Rangoonwala Institute of Hotel Management & Research' are written. The title 'AKSHAY URJA DIWAS. ONLINE ESSAY COMPETITION' is written in the center. The topic is 'ENERGY CONSERVATION'. The essay begins with the sentence 'More energy conserved, More the planet life is preserved.' followed by a drawing of a lightbulb. The main text defines energy conservation as the effort to reduce energy consumption by using less energy service, either by using energy more efficiently or by reducing the amount of service used. It then asks 'There are various ways to conserve energy, but why is the energy conservation important? Why it plays a vital role in our life?' and answers that energy conservation plays an important role in saving non-renewable energy resources, which take many centuries to regenerate. It concludes that humans consume energy at a faster rate than it can be produced, so energy conservation is needed to preserve these precious non-renewable sources of energy.
